INFORMATION LETTER/UPDATE:

GENERAL INFORMATION:

The CRAS-Civilian Response to Active Shooter course was a success. The three-day, 24 hour course focused on a measured surgical response outside a building, in hallways, in rooms and added medical components to the skills. I am going to use it as a model to instruct teachers in Active Shooter Response.

Also, my book **“Leadership and Training for the Fight,”** went into its second printing and is back available at amazon.com

Quiet Month....

INSTRUCTOR NOTES

I just finished several two-day classes this month and all went well. The last class was a Long Range Hunter which has a bunch of moving parts as I am trying to give a comprehensive class on all aspects of long range shooting in just two days. I might be a bit ambitious.

As an instructor, I keep extra rifles/rental guns available for both rifle and pistol classes should a student’s weapon fail them. Being at a static facility, I can do this. On the road it is much more difficult and it should be on the student to have a back-up gun.

Also, one of Todd Tuddle’s sayings to me was, “if it has an adjustment, it can come out of adjustment.” My suggestion to all students is to bring all user manuals, wrenches and anything particular to the weapon you are shooting. For example, if you are shooting an H & K weapon, bring the sight tool for it. I don’t keep them on hand. If you are shooting a sniper rifle, bring wrenches or sockets for the scope mounts, allen wrenches and even a torque wrench for the stocks in the bolts. All have come loose in a class and I put it back on the student to get their gun up and running. Either that, or have a second gun ready to shoot. As for the user manuals, I had eleven hunting rifles with eleven different scopes on them. If

you want to know about your scope, keep the manual in a ziplock bag with the weapon in your gun case.

Participating in a gun buy back because you believe that the criminals have too many guns is like having yourself castrated because you believe that the neighbors have too many kids.

MONTHLY PERSPECTIVE:

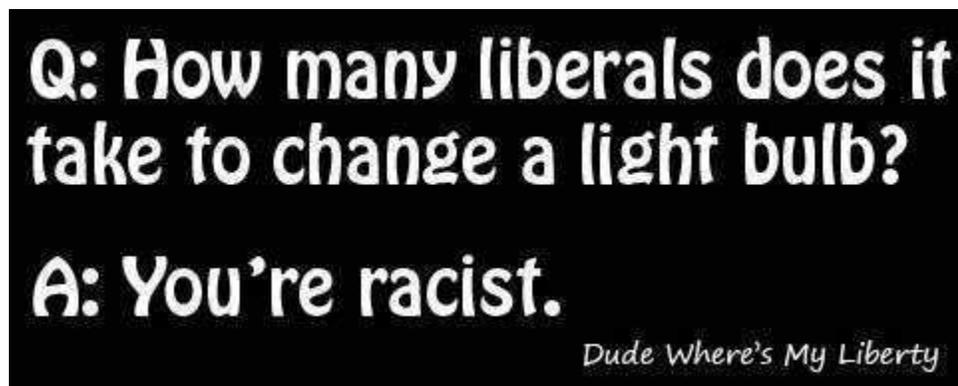

Finally, the liberal media has overtly taken sides in their media war on the American people. They fail to cover anything they do not agree with and help push their unrealistic views on conservative Americans. They must not forget, that they live in the same cities and rural areas as the rest of us that must endure this inept president and his policies. They need to understand that they can be held accountable should this country run aground.

Taking sides in politics means being responsible for what their candidate does and does not do. If you are in a car as a passenger and push the steering wheel, you are just as responsible for the crash as is the driver. Good Americans can let them know this.

The liberal media caters to many of the minorities who are not victims, but who snivel that the world is unfair. We now have females going to combat, no problem as long as the standards do not change for schools the need to attend to get there. Further, there needs to be one "Combat PT" test to meet combat and combat support standards. Not one for every age group under the sun or for males and females. One standard should be established that promotes high combat physical fitness, not the latest civilian workout fad. Next, a few women wanted the equality, then all need to register for the draft. Sorry, what is fair is fair. Instead of using common sense, you lower an overall combat effectiveness of a nation. Dumb. When you can do what I do, you can go where I go.....

Good Americans should arm and learn how to use their weapons. I am not a panic monger or get too excited about all the rhetoric, but I do quietly prepare should the fight ever start. Good Americans should always be prepared. Sometimes you should also have a spare gun and ammunition for ignorant neighbors or family members that sit on the fence. Even if it means giving them an old SKS and some ammo to do their part should the day arrive when it becomes necessary to protect our country and the U.S. Constitution.

Since I be votin' for Obama, my taxes have gone up, my employer stopped offering health insurance and my guns were taken away.

Damn you George Bush.

the logic of
this:

Watching 2 hours of violence in a movie has no
influence on our behavior

BUT a 30 second Super Bowl ad is worth \$3.8 Million
because it will make us run out and buy a product.

We now have the government our
Founding fathers warned us of.
If you keep ignoring that fact we will
soon not be able to overcome the

Liberty. Educate yourself. It is time
to Reclaim America.

"By calling attention to 'a well regulated militia', the 'security' of the nation, and the right of each citizen 'to keep and bear arms', our founding fathers recognized the essentially civilian nature of our economy. Although it is extremely unlikely that the fears of governmental tyranny which gave rise to the Second Amendment will ever be a major danger to our nation, the Amendment still remains an important declaration of our basic civilian-military relationships, in which every citizen must be ready to participate in the defense of his country. For that reason, I believe the Second Amendment will always be important."

TRAINING:

I have had several people express concerns about the ammo situation and training. I can do several things with training classes. First I can do more five and ones. That means five dry fire and one live round, multiple times. This is what I used to do with an entire box of ammo. I can also do more low volume live fire drills where you dry fire the exercise several times and maximize your live rounds. In any case, let me know. You can also just shoot the drills you want and 5/1 any of them to conserve ammo.

I am also looking at running a second CRAS-Civilian Response to Active Shooter's course shortly which is great for civilians and teachers.

If you have any other suggestions, just shoot me an e-mail.

RANGE UPDATE:

We have been tuning up the target house and put a couple of windows in one room, pulled up the old carpet and painted the floors. It is looking good.

EQUIPMENT:

Leupold's new 1-6 x 24 is a great scope for both CQB and distance work. Running the scope on 1 power works great for close work and the ability to work on 6x for distance shots makes it a snap to run my surgical target clean at 100.

I am going to see if I can talk the folks at Leupold into putting a dot below the crosshair in between the first tic mark. This way you can use it for 7 yard zero and for surgical shots at CQB distance. You might even be able to use it for a 300 yard hold.

Bush Monkey Knives out of Ft. Worth makes some heavy duty work and tactical knives at the right price. I have been using the above knife for work and carry and it is tough. I used a small chainsaw file to put notches in handle to aid grip. The only other modification was to trim the sheath down a bit as I like to get at least 3/4 of my hand on it when drawing.

CLASS PAYMENTS

You will have a slot in the course when I receive payment for the class. In the case of an agency, when they officially request an invoice. I have had too many individuals not show up lately and I intend to put a stop to it.

I would prefer you send a check as the credit card costs for processing are substantial.

IN CLOSING

Thanks and we look forward to seeing you all soon.
